[Java Apps Not Quitting Mac](#)

To use the Screen Sharing feature, you need to ensure that you have the right version of Java™ installed on your computer and your Java security settings are set to medium.

Mac users need to follow the steps given below to resolve the screen sharing issues:

1. Compatible Java Version and Security Settings

Make sure you have Java™ 6 Update 33 or higher installed on your computer. Screen sharing will not work if you have a lower version of Java™ installed on your computer.

You can check the version of Java™ on your Mac computer by following the steps given below:

1. Go to **Apple Menu** and access **System Preferences** (see Figure 1.1). You need to then double-click the **Java** icon under System Preferences (see Figure 1.2). If you can't find Java icon, then you probably don't have Java™ installed on your computer. To install Java™, [click here](#).
